16. List of Research Projects/ Consultancy Works

- Number of Projects carried out, funding agency, Grant received - Nil
- Publications (if any) out of research in last three years out of masters projects - 44
- Industry Linkage -
- MoUs with Industries (minimum 3(10)) – 05 MoUs

17. LoA and subsequent EoA till the current Academic Year – 1994 to 2021

18. Accounted audited statement for the last three years – Available

19. Best Practices adopted, if any (I)

1. Title of the Practice:

Teaching Learning process through offline lectures and through virtual classes with the help of ICT enabled tools.

2. Objectives of the Practice:

To enhance teaching learning process carried out for the in-depth education.
To carry out teaching learning process in all situations.

3. The Context:

The institute has adapted the practice of teaching the students in actual classrooms (offline) as well as through online teaching along with the various ICT enabled tools including video lectures of NPTEL courses.

During pandemic when everything was stopped except education. Institute carried out education successfully with the help of ICT tools.

4. The Practice:

Teaching faculty adapted and got well acquainted with the virtual teaching system by using the blend of or either of the following techniques.

(a) Use of digital notepad in online/virtual class.

(b) Use of Google Classroom, Google Meet, Google form, Microsoft 365, Cisco WebEx, OBS studio.

(c) Use Of Audio/Video lectures with PPT. and video lectures from NPTEL.

(d) Use of virtual lab

(e) Use of ICT enabled smart classroom for live streaming of lectures.

5. Evidence of Success:

Effective teaching was carried out throughout the year. Majority of the students attended the lectures online and excelled in university examination.

6. Problems Encountered and Resources Required:

Non availability of internet facility to the students at remote places. Keeping in view such students, faculty have prepared video lectures and made available to the students.

7. Notes (Optional):

To conduct online lectures, we have faced few problems for which feasible solutions are offered by the institute. During lockdown period, online lectures are conducted by the faculty from home.

As many students are belonging from financial weak background and rural areas where internet facility was not available up to the mark.

We have prepared video lectures, which are provided to the students.

When few students could not attend the offline lectures because of lockdown in their cities.

We use to conduct offline lectures in the class which are live streamed.

Sincere efforts are made by all the faculties to continue teaching in all situations. Efforts taken resulted in very good results in university examination and successful completion of the program of final year students.

(II)

1. Title of the Practice:

Hands-on training & practice for students through Maintenance & reparation activities of Utilities & facilities, done at the Institute for CSE, Civil & Electrical Departments.

2. Objectives of the Practice:

To spark the curiosity of learning & discovering through examples of daily applications & amenities.

To heighten & enhance the overall perspective of concepts & Engineering products.

3. The Context:

Electrical Department curate's platforms of learning through Maintenance of various appliances, services and facilities by its trained personnel. Simultaneously, real-time instructions are given to students to perceive theory with practical. Students are demonstrated viable strategies of troubleshooting & maintenance, and at the same time, given the opportunity to carry out guided repairing & fixing of items & services.

4. The Practice:

The Trained Staff & personnel have expertise and technical know-how of handling various devices and malfunctioning of services / devices. The students are made aware with IS rules, safety norms and maintenance work. Students take active participation in the actual repair and maintenance work carried out at Institute level. Electrical circuit design along with the switchgear and protection, actual wiring work is carried out at department level. Training is given to the students regarding the following,

- a. Use of handy toolkits and demos of their usage,
- b. Use of Precautionary instructions, Dos and Don'ts and Safety norms to be followed,
- c. Use of Instructional Material covering basics of a concept
- d. Use of Pictorial representations for better understanding.

Also streamlining the concepts by clarifying the applications and relevance of the activities is being carried out.

5. Evidence of Success:

Students become receptive to an interactive & riveting learning environment which is apparently being done through this practice

6. Problems Encountered and Resources Required:

Students come with a lot of pre-conceived notions & theoretical concepts about how Engineering Stuff works which are erroneous and faulty. As such, they have difficulty grasping the live rectifying operations being done on dysfunctional/repair-worthy instruments.

7. Notes (Optional):

It has been observed that students have been ingrained with a very rote and mechanical method of learning. When it comes to implementing their learning, their performance is very disappointing. The underlying cause behind this lack of ability is lack of proper skills and know-how which should be inculcated during practical or lab sessions in their education.

To overcome this flaw, the best practice of integrating real-life problems and their feasible solutions has been implemented by the Electrical Department, Computer Department by taking issues faced in daily life at an Institute level.

This helps the students to upgrade their skills and take initiatives in solving practical problems relating to engineering products and services, which are vetted by Authorized personnel before interfacing them with students.
